SUMMARY

PD1-certified Salesforce Developer with hands-on experience in LWC, Apex, REST APIs, and large-data processing. Skilled in optimizing governor limits, building modular component architectures, and strengthening CI/CD pipelines. Focused on secure integrations, scalable designs, and measurable performance improvements across applications.

EDUCATION

Vellore Institute of Technology, Chennai
B.Tech in Computer Science Engineering

Sep 2020 – Aug 2024
CGPA: 9.1

CERTIFICATIONS

Salesforce Certified Platform Developer I (PD1), 2025

View

WORK EXPERIENCE

Software Developer — TVS Credit Services, ChennaiJul 2024 – Present

- Built a reusable LWC component library using @wire + LDS, reducing code duplication and cutting rework time by 20%.
- Spearheaded a scalable Knowledge Base in LWC using indexed SOQL and caching, reducing customer query resolution time by 80%.
- Engineered robust Batch Apex processes for LDV operations, decreasing nightly processing errors by 40% and improving data synchronization accuracy across Salesforce by 25%.
- Implemented secure REST integrations with SAP/Mule, lowering sync failures by 30%.
- Enhanced GitLab CI/CD with Checkmarx and SonarQube checks, reducing deployment issues by 35%.

Graduate Engineer Trainee — TVS Credit Services, ChennaiFeb 2024 – May 2024

- Automated processes using Apex and Flows, reducing manual effort by 40%.
- Designed REST integrations with dedupe logic and structured error handling, cutting data inconsistencies by 25%.
- Optimized Apex and LWC implementations for governor limit compliance, reducing CPU time by 30%.

SKILLS

Salesforce Development: Apex (Batch, Queueable), LWC, Triggers, SOQL/SOSL, Flows, Platform Events, Integration Patterns, LDV Handling, Security (CRUD/FLS).

Integrations: REST APIs, SAP/Mule callouts, OAuth2, Error handling.

DevOps & Tools: SFDX CLI, GitLab CI/CD, Git, Checkmarx, SonarQube, VS Code, Postman.

Web & Backend: JavaScript (ES6+), TypeScript, React, Node.js, MongoDB, SQL.

PROJECTS

Knowledge Base
Salesforce Admin, LWC, Apex, JavaScript

- Deployed a unified Knowledge Base in Salesforce LWC for call center executives, streamlining access to loan product related articles.
- Reduced average call center TAT by 25% resulting in lower call drop rates.
- Trained over 50 support agents on the new Knowledge Base workflows and LWC interface, improving overall team efficiency.

AscendAI — AI Career Coach
React, TypeScript, Node.js, PostgreSQL, Gemini API, Shadcn UI

- Orchestrated a full-stack AI career assistant with modular React architecture, reducing development complexity.
- Integrated Gemini AI for personalized guidance, increasing user engagement.
- Developed a quiz engine with real-time scoring, improving assessment accuracy by 40%.
